

PRODUCT

Disposable Heel Grounder

The disposable heel grounder is designed for plant visitors and other temporary workers who enter static controlled areas. It is made from antistatic fabric and provides safe and effective protection.

The disposable heel grounder uses the conductive yarn in the antistatic fabric to create and maintain electrical contact between the ground and body and can optimize static dissipation.

FEATURES

- Easy to use / comfortable to wear
- Economic
- Non-marking
- Surface Resistivity 10^5 Ohms

NOTES

The heel grounder must be tested regularly using the footwear test station, product code 093-0037.

COLOUR	COMPOSITION	SIZE (in)	PACKAGING
Yellow	100% Polyester & Conductive coating	Length: 11.8	10pcs/sheet
		Length: 5.9	100pcs/bag

1

Remove strip to reveal adhesive layer on the underside of the disposable heel grounders.

2

Place the adhesive layer firmly on the sole of the shoe covering at least half of the heel with the rest of the strip behind the shoe.

3

Insert the other end of the heel grounders in the shoe or sock to create the skin-to-ground contact.

4

It is important for the effectiveness of this product that the heel grounders stays under foot when the shoe is on. Repeat this process for the other shoe.
